

The Junk

Similan & Surin Islands

4 Nights Itinerary

Total of 14 scheduled dives including up to 3 sunset/night dives

The following is a sample itinerary of where you might dive during your holiday with us. We wish to show you the very best diving but a number of factors can determine where we visit. Weather, tides, how busy a site is with other dive vessels all play a part in the Cruise Director's decision of which route the yacht takes. The safety of all on board is paramount and we always do our best in offering diving at alternate locations. The Cruise Director is happy to listen to requests from guests to visit or remain at certain sites and providing it is possible and the schedule allows, then guest's requests are respected.

Your Cruise Director will schedule up to 4 dives per day; 3 day dives and either a sunset or a night dive. The diving day has a typical schedule as follows:

- Light Breakfast followed by a briefing & Dive 1
- Full Breakfast, relaxation followed by briefing & Dive 2
- Lunch, relaxation followed by briefing & Dive 3
- Dinner will be served after the sunset dive or before the night dive

Day 1 is reserved for embarkation; there will be no diving on this day. For the final day aboard we schedule 2 dives to allow plenty of time for off-gassing before disembarkation and your flight home. The Cruise Director is happy to listen to requests from guests to visit or remain at certain sites and providing it is possible and the schedule allows, then guest's requests are respected.

Similan Islands

The above water scenery will provide stunningly beautiful white sandy beaches with small forested areas. Dive some of the following sites; Boulder City, Sharkfin Reef, Anita's Reef and Honeymoon Bay. Under the surface you may see: Leopard (zebra) shark, blue spotted stingrays, clown trigger fish, rabbit fish, scorpion fish, snappers, emperor fish, giant trevally and angelfish. The coral gardens, bommies and boulder formations are wonderful to dive.

Elephant Head Rock, visible from the surface, this is the biggest pinnacle in the Similans and has some fantastic swim-throughs. If lucky you might see some white tip reef sharks, batfish, trevally and barracuda can often be seen on the perimeter of the boulders and if you look closely in the cracks and in the rubble you can see smashing mantis shrimp, porcelain crab, moray eels and cleaner shrimp.

Koh Bon

Koh Bon is a dive site where manta rays may be seen. You are likely to see Napoleon wrasse, sweetlips, octopus, blue fin trevally, giant moray eels, great barracudas, fire dart goby, popcorn shrimp, spiny lobster and nudibranchs of many types. The dive sites vary from wall diving to gently sloping reefs and from submerged boulders to coral gardens.

Koh Tachai

Koh Tachai is famous for its pinnacle dive site and more relaxed reef diving. Normally, Turtles, Barracuda, Pipe Fish, and Nudibranchs can be found here. There is also a chance to see bigger species in this area like Manta Rays and Whale Sharks, especially by late January till April.

Richelieu Rock

This limestone pinnacle was named by Jacques Cousteau after General Richelieu, who was an important Danish officer in the Thai Navy. There are gorgeous purple dendronephthya soft corals covering most of the pinnacle and other areas covered in magnificent sea anemones as well. Barely breaking the surface at low tide, this horseshoe-shaped outcropping, slopes steeply to a sandy bottom at 18 to 35 meters (60-120 Ft). This site offers great diversity for such a small and isolated spot. It also offers excellent multi-level diving and, because it is a high-profile reef, there are always sheltered areas to hide from current. The marine life is prolific and includes amongst, many other things; Pharaoh cuttlefish, large octopi, all 5 varieties of anemone fish of the Andaman Sea, variety of moray eels, ornate ghost pipefish, smashing mantis shrimps, harlequin shrimps, tiger tail sea horses, Spanish mackerel, frog fish, many schooling snapper and occasional sightings of manta rays and whale sharks.

Khao Lak Wrecks

There is a choice of easily diveable wrecks between The Similan Islands and Khao Lak. The Boonsung and the Premchai are old tin miners that were sank 25 or so years ago and are a treat for underwater photographers as well as lovers of life of all kinds!! Only in 18m of water they are covered in nudibranchs and shrimps as well as large numbers of the unusual honeycomb moray.

There are also huge numbers of schooling fish as well as rays and leopard sharks that can occasionally be seen. Sea Chart 1 is a slightly more challenging dive and lies between 40 and 25 metres. Sunk during a storm in 2009 with a full load of teak, she is relatively new but already hosts an abundance of schooling fish.
