

# Bahamas – Ultimate Bahamas Experience

## Itinerary - 14 Nights

- Embarkation: Port Lucaya Marina at 17:00
- Disembarkation: Port Lucaya Marina at 08:00
- Meeting point for embarkation: Lighthouse Pointe lobby at 16:45

Lighthouse Pointe is a short walk from Port Lucaya Marina, where MV Bahamas Master will be moored. Our crew will meet guests at the hotel and escort them with their luggage to the boat at the designated embarkation time. Early embarkation is not possible, and guests are kindly asked not to make their own way to the marina.

Transfers between Freeport Airport or local hotels and Lighthouse Pointe are guests' own responsibility.

Guests arriving into Freeport on morning or early afternoon flights on the day of embarkation can purchase day passes from Lighthouse Pointe reception to use the hotel facilities, including luggage storage.

**Marine & Port Fees:** 200 USD per person

Marine park fees can be paid in advance, or on board.

### **Minimum dive certification and experience:**

Divers are recommended to have PADI Advanced Open Water certification\*, or equivalent, with a minimum of 50 logged dives. Minimum age for participation in shark dives is 18 years.

\*Advanced Open Water course can be completed on board.

Guests who do not fulfil the minimum certification and experience recommendations, or who the crew have insufficient experience in certain conditions, may be denied participation in some or all dives.

It is a mandatory requirement for all divers to have insurance which covers scuba diving activities, including emergency evacuation and recompression chamber costs.

Participation in this liveaboard itinerary is subject to acceptance of our Terms & Conditions as outlined here: [www. https://blueotwo.com/terms-and-conditions](https://blueotwo.com/terms-and-conditions).

**Number of scheduled dives:** Up to 45

This itinerary involves some long distance (overnight) travel. Whilst we attempt to ensure the number of dives we have scheduled is fulfilled, bad weather can hinder the yacht's ability to reach a specified dive site in good time.

The following is an example of the day-to-day itinerary.

At Tiger Beach, dives 1-3 are scheduled baited/shark feeding dives during which divers are strategically positioned on the bottom facing the shark feeder. Extra weights help divers to maintain their position in the water as to fully enjoy the shark action.

A comprehensive safety briefing will be given before the shark dives outlining expected shark behaviour and the do's and don'ts of observing the shark activity.

The shark dives at Tiger Beach are comparatively shallow (10-15 metres), which allows for 'open pool diving' after the scheduled baited/feeding dives until sunset.

When visiting other islands, scheduled dives will be more traditional guided dives and, in some areas, after a thorough briefing, 'open pool' dives will also take place.

Guests are responsible for their own dive profiles and for obtaining suitable dive insurance to cover all diving activities.

Safety and dive briefings are conducted in English. If you or any of your group do not speak or understand English, please contact us.

**Day 1: Meet our crew at Lighthouse Pointe at 16:45 for embarkation at 17:00.** Embarkation is followed by introductions, boat and safety briefings and dinner. There is no diving on embarkation day.

Days 2-13

Typically, the full diving days will be scheduled as follows:

- Light Breakfast followed by Dive 1
- Full Breakfast, relaxation period, Dive 2
- Lunch, relaxation period, Dive 3, then open pool until sunset\*
- Dinner

\*Depending on weather conditions and where we are, we will always try to offer a sunset, or night dive. Guests should bring along dive lamps if they have them, although we also have torches available to rent for those who need them.

Day 14: For your final full day on board we schedule two morning dives\* before the boat heads back to Port Lucaya after lunch.

\*We kindly request that guests check their flight departure times to ensure that they leave a minimum of 24 hours between their final dive and their flight home

Disembarkation Day: After breakfast, disembark at Port Lucaya Marina at 08:00

The following is a sample of the dive sites we may visit during your liveaboard on Bahamas Master. Although we wish to show you the very best diving possible, a number of factors can determine which sites we visit.

Our Cruise Director and Diving Director, along with the Captain will take weather, tides, currents and other factors into consideration to determine which route the yacht takes and which sites are selected for diving.

The safety of all on board is paramount and we always do our best in offering diving at alternate locations should we be unable to visit those sites listed below.

Dive sites we visit include but are not limited to:

## Berry Islands

Located roughly midway between Grand Bahama and New Providence, the Berry Islands is a chain of about 30 small islands inhabited by just over 500 people. Here we will dive amongst the tiny cays where we are likely to see Caribbean reef sharks, black tip reef sharks, and eagle rays year-round. The months of November to March also bring chances of seeing tiger sharks, sperm whales, whale sharks, humpback whales and great hammerheads. The area is also well known for its turtle populations, being home to loggerhead, green and Hawksbill turtles.

It is from the Berry's that we first come into the 'Tongue of the Ocean' where depths drop to many thousands of feet. As well as taking in an array of marine life, we will also visit some stunning reef and awe-inspiring drop-offs into the abyss.

## Andros Island

Andros is the largest, yet most sparsely developed island of the Bahamas and boasts exceptional natural surroundings.

### Andros Barrier Reef

The world's third-largest fringing barrier reef, mesmerising blue holes that some say are home to the mythical creature Lusca, the Tongue of the Ocean (a mile-deep abyss teeming with vibrant marine life) and numerous species of flora and fauna.

From Andros we will explore the reefs running adjacent to the abyssal drop-off, and for those that are feeling brave, and with the appropriate training, we'll show you what it feels like to stare into the unknown at depths of more than 40m/130ft, from where the ocean drops to more than 6,000ft! A visit to the Bahamas also wouldn't be complete without experiencing a dive in **King Kong Blue Hole**, one of the many beautiful blue holes around the island.

Andros will also serve as our first real encounter with some impressive wrecks. We will visit a 200ft coral covered vessel in only 18m/60ft of water, allowing you to spend plenty of time on this special site.

## New Providence - Nassau

More shark action to enjoy at **Shark Wall** and **Runway Wall**, starring mainly Caribbean reef sharks but also stingrays, black and Nassau groupers and green-eyed moray eels. These sites can be dived shallow at around 10 metres (33ft). Nearby, the walls drop away, and you can see sharks swimming in the deep blue ocean.

Amongst others sites, we will visit the stunning **Razorback Reef** offering a range of diving from shallow 10 metres/33feet reefs and, for those wishing to enjoy the view of the coral encrusted drop-off, you can venture down to 40metres/130feet plus.

Off the Southern tip of Nassau, we will also visit numerous small wreck sites, including the famous '**James Bond**' wrecks, as well as taking in the many conservation efforts around Nassau in the form of coral propagation.

## Pig Beach, Big Major Cay, Exumas

Weather dependent, we will sail to Big Major Cay for a day of R&R, a chance to de-gas and to soak up some of the beautiful Bahamian sunshine, as well as swimming with the world famous pigs that live on this otherwise uninhabited island. How the pigs got to the island remains a mystery to date but they are very friendly and used to humans, as they are fed by locals and tourists alike. They can drink from fresh water springs on the island. It is quite a unique and remarkable experience.

## Cat Island (weather dependent)

A bit further north of Orange Creek is one of the best locations in the world to see oceanic whitetip sharks. Get up close and personal with these inquisitive and impressive pelagic creatures. Most dives will be in the blue of the open sea but the sharks tend to stay close to the surface.

Please note: Cat Island is a considerable detour from our largely circular route in the Bahamas, and we will only include it in the itinerary if weather conditions are perfect during the months of June, July and August when oceanic white tip encounters are most likely.

## Little San Salvador Island

A full day of beautiful diving here; the island is the tip of an underwater mountain that rises up from 4.6km/15,000ft depth. The seascape is rocky and there many crevasses and crevices where you may find all kinds of creatures, before it ends in a stunning drop-off into the abyss. Usual suspects are turtles and for the lucky ones scalloped hammerhead sharks.

## North Eleuthera

Scuba diving in Spanish Wells off North Eleuthera Island is world class. **Devil's Backbone Reef** is one of the greatest scuba sites in the world. In addition to the beautiful reef there are

many shipwrecks not far off that are fantastic to explore. We'll typically explore the reef or shipwrecks, as well as **Preacher's Cave** or the famous current **Cut Dive**.

## South Abaco

The southern tip of Abaco is largely untouched, though there are a range of beautiful diving sites along the shoreline offering a range of depths and topographical features from reefs and walls, to marine caves and caverns. We will visit South Abaco as one of the final stops on our circular route of the Bahamas.

## Tiger Beach, Grand Bahama Island

As our final stop, Tiger Beach is located off the West End of Grand Bahama Island and the best-known point for tiger and lemon shark encounters at a shallow (10-15m/33-50ft) white sand bottom. This is the ultimate site for photographers and videographers. Good chances of spotting great hammerheads, lemon sharks, Caribbean reef sharks, bull sharks and the occasional nurse shark.

As well as being world famous for its crystal-clear waters and powdery, white sandy bottom, the Tiger Beach area is also home to a multitude of reef networks mini walls, and of course the continental shelf with drop offs to more than 2,000ft, though our average dives in these areas are no deeper than 30m/100ft.

Should you have any questions or queries concerning the dive sites or whether this itinerary is suitable for your experience level, please contact our reservations team [divingholidays@blueotwo.com](mailto:divingholidays@blueotwo.com) who will be pleased to assist and advise you.
